Untreated wood gets its unique character due to the naturalness. Colour or structure variations from the samples shown are standard and have to be accepted. The wood will get a desired patina overtime with daily use, which emphasizes the character of the wood. For further care please notice the general wood information. Puttied areas may have a different colour appearance depending on the surface. For example, dark putty can look lighter on untreated wood.

Natural stone plate:

Jura grey

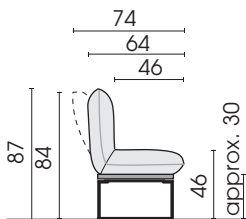

Sanded & impregnated

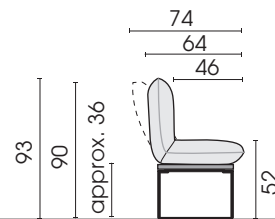

✓

Our natural stone table top, Jura grey, finely polished surface, is a limestone from the Altmühltal near Eichstätt. Its characteristics are the inclusions of fossilized shells and its homogeneous greyish structure. The table tops are treated with a food-safe impregnation at the factory. For daily care, the natural stone can be wiped with a microfiber cloth and a non-acidic, preferably PH neutral soap. Attention! Natural stone is sensitive to acids! Fruit acids, vinegar, lime residues or even tannic acids in red wine, for example, can penetrate the stone and attack the surface.
