Concrete plate:

Our concrete table tops are made of poured concrete. Their low material thickness with high stability is achieved by a glass fibre reinforcement. The concrete table top is coloured throughout and the surface is oiled. Due to the open structure, colour shading may occur on the surface. The table top is light, UV and weather resistant.

Care of oiled concrete surfaces:

For daily care and light soiling, the concrete surface can be wiped with a damp cloth. For further care, we recommend re-oiling the tabletop with stone oil. Please follow the manufacturer's instructions. We recommend the stone and terracotta oil from Osmo.

Natural stone plate:

Our natural stone table top, Jura grey, finely polished surface, is a limestone from the Altmühltal near Eichstätt. Its characteristics are the inclusions of fossilized shells and its homogeneous greyish structure. The table tops are treated with a food-safe impregnation at the factory. For daily care, the natural stone can be wiped with a microfiber cloth and a non-acidic, preferably PH neutral soap.

Attention! Natural stone is sensitive to acids! Fruit acids, vinegar, lime residues or even tannic acids in red wine, for example, can penetrate the stone and attack the surface.

Model OD0919 Thekla is also available as indoor product!
